DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I; Species A-F: Claims 2-7 disclose 6 distinct species distinguished by what body part or ailment the method is treating.

Group II; Species G-L: Claims 8-13 disclose 6 distinct species distinguished by what kind of substance is exuded from the device.

Group III; Species M-P: Claims 14-17 disclose 4 distinct species distinguished by what kind of energy is applied to the patient.

Group IV; Species Q-S: Claims 20-22 disclose 3 distinct species distinguished by what is removed from the patient.

Group V; Species T and U: Claims 37-38 disclose 2 distinct species distinguished by how the substance is actually exuded from the device.

Applicant is required to choose one species from each of groups I-V.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Art Unit: 3763

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
